SOFT SKILLS

- Critical Thinking
- Communication
- Leadership
- Team Work
- Time Management

TECH SKILLS

- Programming: Python, Java, C, C++
- Python Libraries: Pandas, NumPy, Matplotlib, Tkinter, SciKit-Learn
- Tools: Power BI, Canva, Git, GitHub, VS Code, Jupyter Notebook, Google Colab
- Core Areas: Machine Learning, Data Analysis, Data Visualization, Time Series, OOP, GUI Development, DSA

PROFILE

Motivated 2nd-year Artificial Intelligence undergraduate with a strong foundation in programming, mathematics, and data analysis. Seeking internship opportunities to apply problem-solving skills, explore real-world AI applications, and contribute to innovative projects while gaining industry experience.

EDUCATION

MTech Integrated - Artificial Intelligence

2024- 2029

School of Computing| SRM University

CGPA 9.42/ 10.0

PROJECTS

Spendora - Smart Expense Tracker (Java)

Built a full-featured expense tracker with Java Swing, including user authentication, budgets, interactive charts, and CSV/PDF export. Implemented secure password hashing, MySQL data storage, and a modern UI with FlatLaf and SwingWorker for smooth performance.

Tech Stack: Java, Swing, FlatLaf, JDBC, JFreeChart, iText, SHA-256

Sales Forecasting & Demand Prediction (Python)

Built a time-series machine learning model to forecast future sales and created an interactive Power BI dashboard to analyze trends, seasonality, and demand patterns for data-driven business decisions.

Tech Stack: Python, Pandas, Scikit-Learn, Power BI, Time Series

Double Pendulum Simulation (Python)

Built a physics-based double pendulum simulator using numerical methods to model chaotic motion, nonlinear dynamics, energy conservation, phase-space behavior, and sensitivity to initial conditions. Visualized system dynamics to demonstrate real-world chaos theory.

Tech Stack: Python, Numpy, Matplotlib, Scipy, HTML, CSS3, JavaScript

ACHIEVEMENTS & CERTIFICATIONS

Participated in major hackathons including Designathon 2025 - Crack the Complexity, Heisen Hack 2025, and Sea the Future - Marine Conservation (SDG-14), contributing to problem-solving and team collaboration.

Earned NPTEL Elite Certificate in Programming in Java.

Completed industry-recognized certifications in Artificial Intelligence, Data Science, and Data Analytics, including IBM (AI & Generative AI), Coursera (Generative AI & Prompt Engineering), Rice University (Python Data Visualization), freeCodeCamp (Data Analysis with Python), Microsoft Power BI, Cisco (Data Science with Python), Scaler (Java DSA), and HackerRank (Java).

Completed Forage Virtual Job Simulations for BCG X, Deloitte, Accenture, Tata, and JP Morgan Chase, gaining exposure to real corporate workflows.

Built end-to-end projects including Sales Forecasting, Double Pendulum Simulation, Spendora, SymptoCare, and Gradebook Management System using AI, data analysis, and software engineering.
